PROFESSIONAL SUMMARY

Product leader with 14 years of experience shaping product vision, portfolio strategy and scale across startups and billion-dollar ARR enterprise SaaS companies. I have taken multiple products from 0 to 1 to scale and have grown platform adoption through AI/ML features, agentic AI, and product-led growth. Owned multi-million-dollar P&L, led cross-functional teams to common goals. I ensure that C-suite priorities align with what users need, alongside pushing enterprise ARR and deeper customer discovery. Both end-user and admin-facing products have been part of my portfolio and have extensive experience in orchestrating the development of project management platform, newsletter creation tool, embedded analytics, semantic search, SSO, RBAC/ABAC access control, API and connectors. Got a few recognitions along the way, including Employee of the Year, PM of the Semester and Client Champion of the Year. Working in fast-paced, agile, cross-functional settings and staying customer centric comes natural to me.

WORK HISTORY

Senior Product Manager - Simpplr Software, Gurugram, Haryana *06/2025 to Current*

- Led 0-1 development and GTM strategy for an enterprise editorial calendar (project management) tool built to make internal communications planning easier. Went from 0 to 100 enterprise customers in just 3 months.
- Owned the long-term product vision and roadmap for employee engagement portfolio tools. Pushed enterprise adoption up by 23%, through targeted PLG and customer engagement work in partnership with CSM and solution consultants.
- Built image based agentic AI capability that cuts user cold-start friction and lift CSAT scores by 12%.

Senior Product Manager - Cornerstone OnDemand, Gurugram, Haryana *06/2019 to 05/2025*

- Set the product vision, strategy and roadmap for the company's embedded analytics and platform features, one of the stronger offerings in the industry.
- Drove a 32% increase in product adoption by pushing product-led growth and running user group sessions, webinars and workshops. AI-powered semantic search alone brought an 18% lift in eCommerce revenue.
- Delivered a direct \$450,000 ARR increase through focused customer-needs research and new multi-tier pricing.
- Brought AI/ML into the product quickly, adding feedback sentiment analysis and semantic search.
- Built out product management best practices and frameworks, mentored junior PMs, and kept engineering, design and GTM aligned.

Product & Insights Manager - C5i, Mumbai, Maharashtra *10/2016 to 06/2019*

- Managed 0-1 development and GTM strategy for three products covering pricing, content audit and collaboration.
- Led a team of 5 engineers and analysts and owned data crawling, ETL pipeline and feature mapping algorithms for millions of SKUs spanning laptops, FMCG, apparel and CPG domain. Defined process and KPIs for quality control.
- Ran market research and competitive analysis to size up the landscape, gauge market trends and spot opportunities.
- Aligned product vision with senior leadership and helped grow \$3.2 million in P&L.

Senior Financial Analyst - ADP India Pvt. Ltd., Pune, Maharashtra *05/2016 to 10/2016*

- Worked within the FP&A team using time-series forecasting models to predict revenue-margin numbers reported to Wall-street.

Project Manager - Eclerx Services Ltd., Pune, Maharashtra *03/2014 to 05/2016*

- Ran advanced analytics and AI/ML projects for retail (apparel), FMCG and laptop eCommerce clients.
- Advised executives on improving revenue-unit-margin by better segmentation, for in-store and online customers.
- Created and presented QBRs to senior leadership at customer, surfacing growth opportunities for the business.

System Engineer - Infosys, Pune, Maharashtra *10/2010 to 05/2012*

- Used ColdFusion, HTML, JavaScript and MS SQL to build an IT compliance and sourcing web application.

SKILLS

Strategic Leadership

- Product vision and strategy
- Portfolio management
- P&L optimization
- Cross-functional leadership
- Product-led growth (PLG)
- Executive stakeholder management

Product & Platform Expertise

- Lifecycle management (0-1 to scale)
- Enterprise SaaS
- Embedded analytics
- Semantic search
- Identity and access management (SSO)

AI & Technical Depth

- Generative AI and agentic LLM orchestration, Token optimization
- RAG, NLP, Vector search
- Machine learning frameworks
- Tableau, Python, R
- Balsamiq

KEY PROJECTS

- Brought generative AI and agentic LLM orchestration (GPT-4, Gemini 3.5 Flash) into enterprise workflows, building automated agents for newsletter creation and sentiment analysis. CSAT went up 12%.
- Rolled out semantic search in an LMS product, which improved content discovery and increased partner commissions on content consumption.
- Built a recommender system across several product touchpoints, including the homepage, post-learning-completion prompts and skill-based recommendations, driving a 14% increase in average course consumption.
- Put together quarterly business strategy decks presented to the C-suite and used to shape the sales team's action plan.
- Used fuzzy string matching to identify identical FMCG items listed across different online retailers.
- Guided a feature-importance model using Random Forest to find which laptop features had the biggest influence on sales.
- Used a linear mixed model to predict hotel prices across the London region.
- Built purchase propensity models, market basket analysis, logistic regression and clustering in R.
- Ran RFM (recency, frequency, monetary) analysis to explore B2B sales opportunities across accounts.

EDUCATION

Post Graduate Diploma in Management (PGDM): Marketing, Operations - Goa Institute of Management, Goa

Bachelor of Technology (B.Tech): Electronics & Communication Engineering - University College of Engineering, Kota, Rajasthan

CERTIFICATIONS

- Post Graduate Program in AI and Machine Learning - Caltech University
- Hands-on Python & R in Data Science - Udemy
- Business Storytelling - C.C. Chapman
- Effective Product Management - Corporate Training
